Right Provider, Right Place, Right Time

# Call Communicator™

... the **Right Provider, Right Place, Right Time!**

MicroSite access to all calendars

**CALL COMMUNICATOR** offers a single hospital, health care system or multi-specialty clinic a total solution to managing and displaying multiple physicians on-call schedules.

**Call Communicator** unites all of the individual schedules together from multiple clinics or internal services into one easy-to-access location for the entire organization to use. Our schedule creation tool, **Call Scheduler** allows the individual clinic to create, maintain and publish their groups on call schedule.

Created by Doctors, for Doctors, our on-call products ensure you have the right provider in the right place at the right time!

## WHY SO HAPPY?

- The **Patient** is happy because the right doctor was in the right place at the right time.
- The **Physicians** are happy because they were only called when they were on-call.
- The **Daily Users** are happy because all of the information was easy to find, read and use.
- The **Administration** is happy because staff time was reduced; the organization has saved money and improved an outdated process.

The screenshot shows a 'Daily Call Schedule' for February 23, 2009. The table has columns for Service, Job, Time, Provider, Pager, Office, and Protocol. A red oval highlights a section of the table for 'Internal Medicine' and 'Family Practice'.
